	Page
Range introduction, lists of versions	2-3
Handle versions	4-5
Possible arrangements	6
Suggested combinations	7-11
Side-panels, wall side-panels, intermediate side-panels, fitted shelves for side-panels, corner units for side-panels, book bridge	12-14
CD/DVD drawers with glass front	15
Shelf ladder, cylinder lock, hanging file unit	16
Hinge-doors for side-panels, flaps	18-19
Sliding-doors for side-panels	20-21
Guide rails for sliding-doors, rear walls	22
Inside drawer sets, inside flap sets, accessories for inside drawer sets	23
Carcase units for side-panels, fronts and accessories for carcase units for side-panels, insertion cabinets	24-25
Work surfaces	26
Room dividers, carcase units for room divider side-panels, fronts and accessories for room divider side-panels, rear wall panelling for room divider side-panels	27-29
Angled wall panels and angled TV wall panels, accessories for angled wall panels and angled TV wall panels	30-33
TV columns and accessories for TV columns	34-35
Lowboards and accessories for lowboards, IR repeater set	36-37
Lamps, Magic-Tronic, remote control, wall shelves	38-39
Top glass section for TV, cable apertures, column system, flat screen supports	40-41
Coffee tables, dining rooms	42
Sketch raster	43
<b>General information:</b>	
Cable apertures	44
Switch options for lamps	45-47
Special-sized products, special articles	48-49
Important notes: quality of walls / assembly instruction	50

## MEGA-DESIGN

- is a living room, bookcase and library system with HiFi and TV units as well as room divider units that enable optimum exploitation of the space in a room
- is most striking by way of its simple, modern and timeless form of design
- is above all practical, functional and convenient
- is simple to plan with
- enables a lot of possible arrangements because of its intelligent assembly principle

## The concept

**MEGA-DESIGN** is a system range whose units and fronts always have to be fitted between or in front of side-panels. This is a lot of scope for creative different arrangements, going from light and open combinations to more closed and compact ones.

The appearance can be varied by using the various wood, lacquer and rear-lacquered glass versions and especially by combining the same. Since every front, every side-panel, every unit and every rear wall can be ordered separately, you can determine the look of your own, individual bookcase/living room combination with regard to practical aspects as well as the choice of colours. We also provide suggested combinations to make planning even easier.

## The size system

The height raster size is 17.6 cm.

7 different total heights: 2 Raster (R) = 40.6 cm; 4 R = 75.8 cm; 6 R = 111.0 cm; 8 R = 146.2 cm; 10 R = 181.4 cm; 12 R = 216.6 cm; up to 427.8 cm (with wall bracket or for fitting between floor and ceiling)

Front heights in 2, 4, 6, 8, 10 and 12 Raster, carcase heights in 2, 4 and 6 Raster

5 widths: 50, 75, 100, 150 and 200 cm (the unit width is calculated from a side-panel + shelf; to calculate the total width, 3.9 cm must be added for the end side-panel!)

4 side-panel depths: 21.9 cm; 34.7 cm; 45.0 cm; 32.4 cm (room divider side-panel)

## Special functions and possible arrangements

- Versatile side-panel system in wood or lacquer version with different fronts and functions, free planning of versions within a shelf combination
  - Side-panels with 2.5 cm high legs or with 2.5 cm high legs and black plinth skirting
  - Straight and depth-profiled fitted shelves and work surfaces
  - Hinge-doors optionally in wood, lacquer and glass version (clear glass or rear-lacquered glass), sliding-doors optionally in wood or rear-lacquered glass version
  - Numerous HiFi and TV functions: lowboards, angled (TV) wall panels for fitting between side-panels or anywhere on walls, TV columns for fitting between side-panels
  - Insertion cabinets
  - Room dividers units
  - Carcase units for side-panels and room divider side-panels, fronts for carcase units, sets of inside drawers
  - All hinge-doors with cushioning brush, all rear walls with brush seal
  - Comprehensive assortment of lamps, Magic-Tronic, remote control
  - **hülsta Push-to-open/hülsta-SoftFlow**: drawers of inside drawer sets and of TV columns with **hülsta-Push-to-open** as fully pull-out units on hidden roller bearings with Push-to-open bracket and 3-dimensional adjustability; all other drawers with **hülsta-SoftFlow** on hidden roller bearings with cushioned automatic closing device as fully pull-out units
  - **hülsta-MagicClose**: all wood/lacquer hinge-doors with cushioned door closing
  - **hülsta-MagicJoin**: invisible connecting bracket between shelves and side-panels in the side-panel system
  - Max. load of fitted shelves (up to 75 cm width) as well as drawers: 25 kg  
Max. load of fitted shelves (from 75 cm width): 15 kg
- Please also note any maximum loads which may be stated in the type list for the individual units!

## Lists of versions

Model no.	Versions	Price group	Model no.	Fronts of hinge-doors, drawers and flaps *	Price group	Model no.	Fronts of sliding-doors	Price group
640	White lacquer	I	640	White lacquer	I			
648	Pure white lacquer	I	648	Pure white lacquer	I			
641	Grey lacquer	I	641	Grey lacquer	I			
663	Silk grey lacquer	I	663	Silk grey lacquer	I			
685	Natural oak	II	685	Natural oak	II	685	Natural oak	II
680	Core walnut	II	680	Core walnut	II	680	Core walnut	II
			720	Rear-lacquered glass, white	III	720	Rear-lacquered glass, white	III
			730	Rear-lacquered glass, pure white	III	730	Rear-lacquered glass, pure white	III
			723	Rear-lacquered glass, grey	III	723	Rear-lacquered glass, grey	III
			733	Rear-lacquered glass, silk grey	III	733	Rear-lacquered glass, silk grey	III
			Model no.	Insertion cabinets: rear-lacquered door rim / glass panel of hinge-door	Price group	Model no.	Sliding-doors: guiderail cover	Price group
			640	White lacquer / Optiwhite glass	III	640	White lacquer	I
			648	Pure white lacquer / Optiwhite glass	III	648	Pure white lacquer	I
			641	Grey lacquer / stained glass	III	641	Grey lacquer	I
			663	Silk grey lacquer / stained glass	III	663	Silk grey lacquer	I
			669	Aluminium-colour lacquer / Optiwhite glass	III	942	Aluminium colour	I
						685	Natural oak	II
						680	Core walnut	II

In MEGA-DESIGN colour combinations within individual units are possible. In this case please state the model number clearly and separately in the order! If versions from different price groups are exchanged, the higher price group is always charged.

\* Flap fronts are not available in rear-lacquered glass (exception: flap of lowboard type 21402)!

## Plinth versions

MEGA-DESIGN provides two different plinth versions. If no further details are stated in the order, we deliver plinth version A!

**A** with 2.5 cm high legs in stainless steel look

**B** with 2.5 cm high legs and black plinth skirting

## Wall fitting

**Important notes:** Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class C12/15. For other materials (please see separate materials table in the wall composition chapter) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site. Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

# Handle versions

<div> <b>Handle versions</b> </div> <div>                     MEGA-DESIGN provides a number of different handle versions. If no details are given in the order, a standard handle knob 113 is supplied. Alternative handle versions can be ordered without a surcharge. Please state clearly in the order! Sliding-doors with standard 4 cm high handles.                 </div> <div>                     Note: Fronts with clear glass panels or rear-lacquered glass panels can only be fitted with handle knobs.                 </div>					
<div> <b>Handle knob 113</b>                      Standard handle; in stainless steel look                 </div> <div>  <div>                         Ø 2.1 cm                     </div> </div>	<div>                     Stainless steel look                 </div>	<div>                     Standard handle   <b>113</b> </div>	<div> <b>Handle knob 156/157/158</b>                      optionally in natural oak (handle 156), core walnut (handle 157) or stainless steel look (handle 158)                 </div> <div>  <div>                         Ø 2.6 cm                     </div> </div>	<div>                     Natural oak                       Core walnut                       Stainless steel look                 </div>	<div> <b>156</b>   <b>157</b>   <b>158</b> </div>
<div> <b>Handle knobs 141 - 159</b>                      optionally:                      White lacquer (handle 141)                      Pure white lacquer (handle 159)                      Grey lacquer (handle 145)                      Silk grey lacquer (handle 150)                      Natural oak (handle 146)                      Core walnut (handle 147)                      Stainless steel look (handle 148)                 </div> <div>  <div>                         Ø 1.3 cm                     </div> </div>	<div>                     White lacquer                       Pure white lacquer                       Grey lacquer                       Silk grey lacquer                       Natural oak                       Core walnut                       Stainless steel look                 </div>	<div> <b>141</b>   <b>159</b>   <b>145</b>   <b>150</b>   <b>146</b>   <b>147</b>   <b>148</b> </div>	<div> <b>Handle 162/163</b>                      optionally in matt chrome (handle 162) or high-gloss chrome (handle 163)                 </div> <div>  <div>                         5.6 cm wide                     </div> </div>	<div>                     Matt chrome                 </div>	<div> <b>162</b> </div>

## Possible arrangements

- 1 Side-panel** – 2, 4, 6, 8, 10 or 12 Raster high, 21.9; 34.7 or 45.0 cm deep; with optional 2.5 cm high legs (A) or with 2.5 cm high legs and black plinth skirting (B); incl. wall bracket.
- 2 Hinge-doors for side-panels** – 4, 6, 8, 10 or 12 Raster high; in optional wood or lacquer version, with clear glass front or rear-lacquered glass front; rear-lacquered glass fronts (glossy) in aluminium frame and panels of rear-lacquered glass.
- 3 Carcase unit for side-panels** – 2, 4 or 6 Raster high, carcase in standard grey lacquer, with **2 Raster drawers for carcase units**. The carcase units can be fitted between 34.7 or 45.0 cm deep side-panels and fitted shelves. These 2 Raster drawers can only be fitted in carcase units for side-panels.
- 4 Intermediate side-panels for fitted shelves** 21.9; 34.7 or 45.0 cm deep; for vertically dividing compartments on fitted shelves. Fitted shelves and fitted glass shelves can not be assembled at the side of intermediate side-panels.
- 5 TV columns** – 50.8 cm high; are assembled in open sections between 34.7 or 45.0 cm deep side-panels and must always be fitted on the floor. Drawers with hülsta-Push-to-open.
- 6 Front LED spotlamps** (silver coloured); are assembled in front of fitted shelves from 46.1 cm width. Be sure to mark position in sketch. Cables and transformers are stored inside the shelves or in a groove at the back of the side-panel. 12 V; 1.5 W. Cannot be fitted in room dividers units and at the same height as guide rails for sliding-doors.
- 7 Sliding-doors for side-panels** – 2, 4, 6, 8, 10 or 12 Raster high; in optional wood version or with rear-lacquered glass front; rear-lacquered glass fronts (glossy) in aluminium frame and panels of rear-lacquered glass.
- 8 Guide rails for sliding-doors** – cannot be fitted in front of fitted glass shelves; width reductions down to a min. 30 cm for outer shelves.
- 9 Sliding-door cushioning**: sliding-doors are fitted with standard cushioning devices at the ends of the guide rails. If 2 (or more) sliding-doors are fitted next to one another between guide rails, no cushioning device is fitted between the sliding-doors.
- 10 Inside corner doors** – 4, 6 or 8 Raster high; in optional wood or lacquer version
- 11 Inside corner slat** for 90° corner unit with corner shelves
- 12 Side-panels** – ceiling high up to 264.7 cm, ceiling high with height adjusting screws up to 267.2 cm or extra high up to max. 427.9 cm incl. ceiling fitting bracket, 21.9 or 34.7 cm deep
- 13 CD or DVD drawer with glass front** – glass front optionally of clear or satinised glass. The CD or DVD drawer is assembled in the open section or behind sliding-doors on fitted shelves (handle panel in matching wood, compartment grey lacquered). Assembled only between 2 shelves. Required assembly height: 25.3 cm (drawer 19.5 cm high). Caution: Different to height raster.
- 14 Angled TV wall panels** – 4 or 6 Raster high, 45.5 cm deep; fitted in open sections between side-panels and shelves and must be fixed firmly to a wall; incl. cable management: The shelf can be drawn forwards on gliders by 8.0 cm. Behind it is a textile cable tub. The panel has a groove cut in the lower section. This makes it easy to connect all electronic equipment with cables.
- 15 Rear wall incl. end shelf** – 2 or 4 Raster high; fitted below angled TV panel between side-panels and shelves. Rear wall with transverse veneer, 1.1 cm thick (req. space 2.7 cm). Later assembly and assembly of intermediate side-panels not possible.
- 16 Top LED spotlamps** (silver colour); are assembled on fitted shelves from 46.1 cm width. 12 V; 1.5 W. Cannot be fitted in room dividers units. Assembly only above eye level.
- 17 Rear walls** – 1.1 cm thick (req. space 2.7 cm), fitted between side-panels, 2-12 Raster high. Fitted shelves can be placed anywhere. Later fitting of rear wall is not possible. Rear walls must always be ordered with room dividers units when fitting hinge-doors and room divider panelling.
- 18 Wall side-panels** – 2, 4, 6, 8 or 10 Raster high, 21.9; 34.7 or 45.0 cm deep; max. width of a wall side-panel arrangement: 300 cm. The wall side-panels may only be fitted on absolutely solid walls. Gypsum or other light masonry is not suitable for this purpose. Max. load of a wall side-panel column (consisting of 2 wall side-panels and fitted shelves): 100 kg. Lamps, sliding-doors, corner units and shelf ladders cannot be fitted on wall side-panels.
- 19 Lowboard** – 40.6 cm high; 51.8 cm deep; with 1 flap (with 1 partition); incl. 2 cable apertures
- 20 Fitted shelves for side-panels and wall side-panels** – 21.9; 34.7 or 45.0 cm deep; in 5 widths

Suggested combinations

MEGA-DESIGN

As an alternative to planning an individual unit from the complete range there is the possibility of choosing from specially suggested combinations. This eases planning. Incorporating accessories can enhance the suggested combinations. These are charged extra.  
All suggested combinations incl. rear walls behind fronts (exception: no rear walls behind sliding-doors).

## Side-panels

Cable aperture for side-panels:  
see "Cable apertures" chapter!

**Side-panels**, 3.9 cm thick, 21.9; 34.7 resp. 45.0 cm deep

Plinth versions:  
optionally with 2.5 cm high legs (A) or with 2.5 cm high legs and black plinth skirting (B); incl. wall bracket. Please state the plinth version (A or B) in the order (see below)!

Please remember to leave 2.5 cm assembly space to the ceiling and 1.5 cm at the sides in every project with side-panels without ceiling fitting brackets!

With ceiling-high side-panels: please state true room height!

Height reductions of the ceiling-high side-panels down to 12 Raster (216.6 cm) without surcharge.

The extra high side-panels (max. 430.4 cm) are always split at 14 Raster height (251.8 cm). Height reductions without surcharge.

Ceiling-high and extra high side-panels in wooden version do not have a top rim. Top rim at a surcharge (see Special-sized products).

		Raster heights						Up to 264.7 cm	Up to 267.2 cm ceiling high, with height adjuster screws at top	Up to 430.4 cm for extra heights, ceiling high up to max. 430.4 cm (incl. brackets)
		2 = 40.6 cm	4 = 75.8 cm	6 = 111.0 cm	8 = 146.2 cm	10 = 181.4 cm	12 = 216.6 cm

## Wall side-panels

**Wall side-panels**, 3.9 cm thick, 21.9; 34.7 or 45.0 cm deep

Please remember to leave 2.5 cm assembly space to the ceiling and 1.5 cm at the sides in every project with side-panels without ceiling fitting brackets!

Max. width of a wall side-panel arrangement: 300 cm.

The wall side-panels may only be fitted on absolutely solid walls. Gypsum or other light masonry is not suitable for this purpose. Max. load of a wall side-panel column (consisting of 2 wall side-panels and fitted shelves): 100 kg, please observe the notes on page 6. Lamps, corner units and shelf ladders cannot be fitted on wall side-panels.

**Assembly notes for wall units:**  
Please be sure to note here the  
information and notes in the  
"Wall composition" chapter!

## Runners for sliding-doors

The sliding-doors are fitted on runners that have to be ordered separately (see below) and in front of a full-length row of shelves. Please state **in front of which side-panel columns** the sliding-doors are to be fitted. 2 (or more) sliding-doors can also be fitted on top of one another. In this case, 1 (or more) extra intermediate runners have to be ordered besides the standard set of runners (top and bottom). If the runners are required in a **special length**, please order the next longest runner size. This is then shortened at no extra charge. Please state the exact runner length in the order! **No front spotlamps and no further fronts** can be fitted in the area of the runners.

**Sliding-door cushioning:** the sliding-doors are only cushioned at the ends of the runners. If 2 (or more) sliding-doors are placed next to one another between the runners, there is no cushioning device fitted in between these sliding-doors.

**Guiderails and cover caps** aluminium-coloured, **guiderail cover** in wood and lacquer versions as well as aluminium-coloured. Please state the required version clearly in the order!

**Runners for sliding-doors** – Do not fit in front of glass shelves; width reductions down to a min. 30 cm on the outer shelves.

Please state **in front of which side-panel columns** the sliding-doors are to be fitted. 2 (or more) sliding-doors can also be fitted on top of one another. **No front spotlamps and no further fronts** can be fitted in the area of the runners. When planning sliding-doors in front of fitted shelves that are more than 96.1 cm wide, please note that these shelves must be supported by side-panels.

Profile length (plus 4 mm for cover caps)		98.6 cm wide	148.6 cm wide	198.6 cm wide	223.6 cm wide	248.6 cm wide	298.6 cm wide	348.6 cm wide	373.6 cm wide	398.6 cm wide	448.6 cm wide

## Rear walls

### Rear walls

Rear walls - 1.1 cm thick - (space required 2.7 cm), fittable between side-panels, 2-12 Raster high. Fitted shelves can be placed anywhere. Later fitting of rear wall is not possible. For room divider units we recommend fitting rear walls where hinge-doors and room divider panelling is used. In this case these must be fitted between two fitted shelves. All rear walls in wood version have a vertical veneer, exception: 2 Raster rear walls have a horizontal veneer. **Rear walls with all-round cushioning brush!**

When integrated LED spotlamps are fitted, the niche rear wall must be split at the height of the lamps. Please remember this when planning!

MEGA-DESIGN provides functional room divider units with side-panels and shelves. Fronts (wood, lacquer and glass doors, see pages 18-19) can be fitted at both sides of side-panels. This means that MEGA-DESIGN room dividers can also be used at both sides.

Room divider carcase units (see pages 28-29) and inside corners can also be included. Rear panelling can also be fitted (see page 29). If hinge-doors are required in front of room divider side-panels, hinge-doors must be fitted at one side and rear wall panelling at the other side.

2 Raster lowboards, sliding-doors, fitted glass shelves, lamps and shelf ladders cannot be fitted in room divider units.

Room divider side-panel

Room divider side-panel, 3.9 cm thick, 32.4 cm deep

Plinth versions:

optionally with 2.5 cm high legs (A) or with 2.5 cm high legs and black plinth skirting (B); incl. wall bracket.

Please state the plinth version (A or B) in the order (see below)!

Room divider units can only be fitted completely between floor and ceiling. If the room divider is fixed to a wall at one end and has a maximum width of 203.9 cm and a maximum height of 8 Raster, the ceiling fitting bracket can be omitted.

Please state true room height!

		Height up to max. 264.7 cm Height reductions down to 2 m height without surcharge.

**Integrated multiple plug with automatic cut-off**

Can be fitted in lowboard behind rear wall optionally left (L) or right (R); please state clearly in the order!  
Later fitting not possible.

**Not for sale in the UK!**

Front view

Rear view

**Automatic cut-off:**

Cut-off: single pole  
Power: 16 A/1500 W  
Protected range: IP20  
Operating power: 195-265 VAC  
Ready: 35 secs after pressing switch  
Holding current: min. 0.018 A, max. 0.310 A  
Power consumption standstill: 0 W,  
independent of load  
Power consumption electronics: 1.25 W  
Temperature: -5 °C to +40 °C  
Material: PA6 GF30 V1, filament tested  
up to 850 °C  
Profile: eloxised alum., no HE  
Colour: black  
Dimensions: 486 x 52 x 44 mm  
Space required: min. 59.0 cm

**Connection:**

Current: input/output GST18/3i  
connector systems  
1x key connection with 0.5 m  
H05VV-F2x0.75 mm<sup>2</sup> black with  
connecting plug GST15i2 black  
connector systems

**Socket:**

Protected plug acc. to DIN 49 440,  
tested acc. to: VDE0620-1  
Twin-pole with protected plug  
16 A/1500 W, 250 VAC  
1x grey (permanent current),  
1x black (master),  
3x black (slave)  
turned through 35°

**Operating method:**

The automatic cut-off is an automatic break in the current for several units. Connect any media unit with an ON/OFF switch to the main socket and the other units to the switchable sockets. The device goes into operation on connecting the main unit. The electronics are activated by pressing the switch. If the unit connected to the main socket is not switched on within 35 seconds, the automatic cut-off comes into operation electronically.

**Example:**

A TV set is connected to the main socket and the peripheral units such as video recorders, DVD players, home cinema units or satellite receivers are connected to the extra sockets. When you switch on the TV set, all peripheral units are switched on automatically. You can use the permanent current socket for units which require permanent current (fax, telephone, hard disk units, etc).

**Multiple socket with automatic switch off**

1 socket continuous current; 1 master and 3 slave sockets

## IR repeater set

### IR repeater set

Infrared signal transmission set for operating media units behind wooden/lacquered fronts. You can operate all the units in one compartment with one set. The following applies:

- One set must be used in each compartment. 2 transmitters can also be installed in large compartments in order to increase performance. In this case only one additional transmitter needs to be ordered.
- The transmitter must be placed in the direct vicinity of the receiver eye.
- Transmittable IR frequency band 20 – 60 kHz
- Up to 3 transmitters can be combined with one receiver.

It is possible to use 3 transmitters via 1 receiver including Master box. This enables simultaneous operation of 3 different furniture compartments or in critical situations it allows fitting out one furniture compartment with several transmitters in order to increase the performance in this compartment or to operate 2 end units placed next to one another.

The IR repeater set consists of:

- 1 receiver eye (Ø 3.0 cm) incl. standing bracket
- 1 electrical transmitter
- 1 plug EVG 12 V
- Cable clips

**Please note the details stated in the operating instructions!**

<b>IR repeater set</b> 1 receiver eye and 1 transmitter incl. standing bracket	<b>Extra transmitter</b>
<b>2001</b>	<b>2003</b>

# Lamps

**Please note:** We recommend using the same light sources in combinations in order to achieve uniform lighting and colour effects.

This luminaire contains built-in LED lamps of the energy classes A++ to A. The lamps cannot be changed in the luminaire. 12 V		LED lamps incl. foot switch. A radio remote control is possible for operation (against a surcharge).			
<b>Please note:</b> No fronts can be fitted directly above <b>front and top spotlamps</b> . When fitting a <b>front spotlamp</b> in front of the top fitted shelf one must observe a distance of at least 3.0 cm between the top fitted shelf and the ceiling, when fitting a <b>top spotlamp</b> the distance to the ceiling must be at least 4.5 cm.					
<b>Lamps are not possible for wall side-panels.</b>

		-	-	-	-

The lamps are normally operated by an external footswitch. As an alternative we can also provide a Magic-Tronic switch, which is charged extra. By “stroking” the outer or top side of the unit at the same level as the invisible integrated sensor it is possible to switch all the lamps on and off (“Stroking method”). As an alternative the position of the hidden sensor can also be marked with a small metal plate on the furniture unit (“Marking method”). Lamps with a maximum power of 200 W can be operated by a Magic-Tronic unit (230 V). The footswitch is omitted when a Magic-Tronic unit is included.

Please be sure to observe the information and notes regarding the assembly position!

7617

-

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the “all on” or “all off” buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

## DINING Dining tables and chairs

### DINING

hülsta offers a room concept to meet all requirements in comfort, beauty of form and attractiveness with a comprehensive collection of dining room tables and chairs.

The **dining tables** in a wide variety of sizes (with and without pullout function) in all wood surface versions and in contemporary designs, as well as the **dining chairs** that can be combined individually using different armrests, comfort features, high-grade cover fabrics (leather, textiles) and metal surfaces can all be found in the “**DINING**” type list.

## Coffee tables CT 160

### Coffee tables CT 160

The **CT 160 coffee table** in sizes of 80 x 80 cm and 110 x 80 cm offers three different plinth versions. The bottom shelf is veneered or lacquered, the superstructure is of glass, in one of three optional glass versions.

You will find the coffee table CT 160 as well as other coffee tables in the “**Coffee tables**” type list!

## Coffee tables

### Coffee tables

hülsta offers a comprehensive **collection of coffee tables**, which not only match the hülsta furniture ranges perfectly but can also be combined with other products that are available on the market. You will find these coffee tables in a number of designs, sizes and versions in the “**Coffee tables**” type list.

Sketch raster for the MEGA-DESIGN range

Note on calculating widths!

The width table states all widths up to 475 cm (wider units always in steps of 25 cm), but only includes the unit widths of 50, 75, 100 and 150 cm. This width is calculated from a side-panel + shelf. To determine the total width, 3,9 cm must be added for the end side-panel!

Please superimpose unlined paper and write firmly. In order to avoid slipping, use 2 paper clips or fold the edge of the drawing sheet.

Check list

- 1.) Do the sketch and the order match? Do the dimensions and the sketch match the type number? Are all type numbers correctly stated in the sketch? Can one see the position of door hinges?
- 2.) Are all type numbers correct? Have you perhaps confused price and type numbers?
- 3.) For side-panel assembly with adjuster screws at top: please state exact ceiling height. If the units do not reach up to the ceiling, please state the exact side-panel size.
- 4.) Has the width dimension been correctly calculated? It is calculated from a side-panel + shelf: to calculate the total width, 3,9 cm must be added for the end side-panel!
- 5.) When combining wood and lacquer versions: is it quite clear, which shelves, side-panels, units, rear walls and fronts are to be delivered in which version?
- 6.) Are fitted and front halogen spotlamps, bookcase ladders, rear walls and interior fittings for flap units marked in the sketch?
- 7.) When ordering sliding-doors: Have you ordered the runners separately and stated, in front of which side-panel columns the sliding-doors are to be fitted?
- 8.) Have you stated the desired handle and plinth versions?
- 9.) Is this a follow-up order? If so, when was the original order? Have shelves been fitted in front of rear walls? Please state separately! If possible, include a sketch on which the existing and new units are clearly marked.

Raster	Sizes in cm	475	450	425	400	375	350	325	300	275	250	225	200	175	150	125	100	75	50

# Cable apertures

It is possible to provide the cover shelves, side sections, shelves, etc., in units from nearly all the hülsta living room ranges with cable apertures so it is easier to feed cables of electronic equipment through these units. There are four different types of cable apertures to choose from, as listed here. **Please be sure to follow the important notes.**

<p><b>Cable aperture K1</b></p> <p>Cable aperture for 80 mm hole, silver colour <b>Standard cable aperture; particularly suitable for cover shelves, side sections and shelves</b></p> <p><b>Sizes:</b>  Assembly height: 21 mm  Outside diameter: 92 mm  Inside diameter: 74 mm  Diameter of hole: 80 mm</p>  <div>K1</div>	<p><b>Cable aperture K2</b></p> <p>Cable aperture for 80 mm hole, silver colour <b>particularly suitable for rear walls and side sections</b></p> <p><b>Sizes:</b>  Assembly height: 8 mm  Outside diameter: 92 mm  Inside diameter: 74 mm  Diameter of hole: 80 mm</p>  <div>K2</div>	<p><b>Cable aperture K3</b></p> <p>Cable aperture for 60 mm hole, silver colour <b>particularly suitable for shelves and constructional shelves</b> (suitable to an extent for scart cables)</p> <p><b>Sizes:</b>  Assembly height: 21 mm  Outside diameter: 72 mm  Inside diameter: 54 mm  Diameter of hole: 60 mm</p>  <div>K3</div>	<p><b>Cable aperture K20</b></p> <p>Cable aperture for 80 mm hole, silver colour <b>particularly suitable for side-panels and centre partitions</b></p> <p><b>Sizes:</b>  Assembly height: 2x 8 mm  Outside diameter: 92 mm  Inside diameter: 74 mm  Diameter of hole: 80 mm</p>  <div>K20</div>

**IMPORTANT NOTES Please be sure to note!**  
Please be sure to state the **exact position** of the cable aperture in your order (always measure distances from the centre of the cable aperture). For **wall units** the cable aperture is only possible in the bottom position (due to the suspension brackets). With **cover shelves**, the position of the cable aperture is determined in the factory, in accordance with factors specific to the given range. The same applies to technical exceptions because of custom-based planning. The K 20 is positioned in the centre (depthwise) in the **side-panel**. Please state the exact height (centre of hole of cable aperture from bottom rim of side-panel)! Subject to technical progress.

The **minimum distance** for the cable aperture (measured from the inside): 100 mm from the side and 70 mm from the rear (for horizontal surfaces) or 100 mm from the side and 70 mm from the base (for vertical surfaces). Please state if the aperture is to be fitted at the left, at the right or in the centre.

**Standard position:** If no details of the exact position of the cable aperture are given in your order, the cable aperture is always fitted at the bottom centre or at the rear centre of the relevant surface, whereby the distances stated above still apply.

**Caution!** Please note that the cable aperture can not be fitted where there is an integrated or front spotlight, centre partitions or a split rear wall. **Please be sure to observe the following explanatory diagrams!**

for vertical surfaces	for horizontal surfaces
<p><b>Minimum distance</b>  100 mm from the side and 70 mm from the base</p>  	<p><b>Minimum distance</b>  100 mm from the side and 70 mm from the rear</p>  
<p><b>Standard position</b>  at the centre of the surface and 70 mm from the base</p> 	<p><b>Standard position</b>  at the centre of the surface and 70 mm from the rear</p> 
<p><b>Please note!</b>  If there is an integrated or front spotlight in a shelf, for example, the cable aperture cannot be fitted at this position!</p> 	<p><b>Please note!</b>  If there is a centre partition, for example, between two shelves, the cable aperture cannot be fitted at this position!</p> 

Magic-Tronic

The lamps are normally operated by an external footswitch. As an alternative we can also provide a Magic-Tronic switch, which is charged extra. By “stroking” the outer or top side of the unit at the same level as the invisible integrated sensor it is possible to switch all the lamps on and off (“Stroking method”). As an alternative the position of the hidden sensor can also be marked with a small metal plate on the furniture unit (“Marking method”). Lamps with a maximum power of 200 W can be operated by a Magic-Tronic unit (230 V). The footswitch is omitted when a Magic-Tronic unit is included.

Standard position of Magic-Tronic:

- for (assembly) units and wall units: **in the right outer side section**
- for side-panel combinations: **in the right outer side-panel**

Standard depth position:

- for (assembly) units, wall units and side-panels: **approx. 12 cm from the rear rim**

Standard height position:

- for all ranges (exception: SCOPIA range): for 1 to 8 Raster high floor (assembly) units and side-panels: **approx. 7-15 cm from the top rim of the appropriate unit**
- for the SCOPIA range: for 2 to 12 Raster high floor (assembly) units: **approx. 7-15 cm from the top rim of the appropriate unit**
- for all ranges (exception: SCOPIA range): for 10 to 12 Raster high floor (assembly) units and side-panels: **in approx. 115 cm height**
- for the SCOPIA range: for 16 to 18 Raster high floor (assembly) units: **in approx. 115 cm height**
- for wall units: **fitted at a height determined in the factory in accordance with factors specific to the given range.** The same applies to technical exceptions because of custom-based planning.
- for angled wooden shelves: fitted **in the right side of the rear wall panel in accordance with factors specific to the given range**

Alternative positions:

If the Magic-Tronic sensor is to be fitted in the **left outer side section** of an (assembly) unit or wall unit, in the **left outer side-panel, in the left side of the rear wall panel of angled wooden shelves or at any position other than that stated as standard** (e.g., if a unit is planned in a niche so that there is insufficient space to the right of the unit), **please state this clearly in the order and mark the position in the sketch. If in doubt, please contact your hülsta customer advisor!**

Please note:

- Double functions in one shelf like spotlamps, lamps, transformers, wall shelf brackets and Magic-Tronic units are not possible for reasons of stability and lack of space.
- In the case of NEO media panels, the unit is fitted 12 cm from the right side and from the bottom rim.

Illustration 2: “Marking method“

Magic-Tronic
7617
-

Examples of use (schematic diagrams)

**Black point** = Standard position of Magic-Tronic sensor for floor (assembly) units, wall units and angled wooden shelves (example 1) or for side-panels (example 2)

Notes:

The black point in the drawings is the area where the Magic-Tronic sensor is invisibly integrated. If the surface is „stroked“ at this position, the lamps are switched on or off.

If you would like to mark the position of the Magic-Tronic sensor on the furniture, you can fit a small metal plate supplied separately at the corresponding position.

In side-panels the Magic-Tronic unit can be operated from both sides of the side-panel, i.e. both from the outside as well as from the inside of the right side-panel - this means that the Magic-Tronic can even be operated when the furniture is fitted in a niche and there is insufficient space to the right of the unit. Please note here that no objects should be placed on the inside of the unit in order to be able to operate the Magic-Tronic from the inside.

Example 1

Example 2

Switch options for lamps:  
Radio remote control with change of colour temperature

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the “all on” or “all off” buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

The following points must be noted with the radio remote control:

- The receiver must be positioned behind a rear wall or under plinth shelves (at least 20 mm space required under plinth shelves).
- The total wattage power of all lamps included per receiver must not exceed 30 W.
- 4 channels = 4 light groups
- 1 light group = x lights
- All lamps within a light group can be dimmed to the same brightness.
- The change of the colour temperature takes place for all lamps in all light groups.
- The radio remote control is not suitable for equipment operating on 110 V.

Please be sure to note the operating and programming instructions!

4-channel radio remote control with change of color temperature

4-channel radio remote control  
with change of color temperature

Type	2119	-
------	------	---

## Examples of use (schematic diagrams)

### Example 1

#### Lights inside a unit

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamp in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps in the open compartment

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlamp in the right cabinet

#### Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

### Example 2

#### Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamp and the LED light panels in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps and the LED light panels in the centre cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlamp and the LED light panels in the right cabinet

#### Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

### Example 3

#### Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamps in the left, centre and right cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the top LED light panels in the left, centre and right cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the bottom LED light panels in the left, centre and right cabinet

#### Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

## Notes on calculating sizes of sloping units

### Side sloping

Sloping is only possible on single-door units. The door hinge (left or right) is positioned on the taller outer side of the unit.

#### Measurements required:

- H 1 = Room height
- H 2 = Height of slope (If a space is required between the wall and the wardrobe/unit, please state the exact distance.)
- B 1 = Width of slope
- B 2 = Width of slope
- G = Total width
- S = Wardrobe width

#### Please note!

- As floors, ceilings and walls are never exactly straight, the exact room size must be measured using a spirit level.

### Rear sloping

#### Measurements required:

- H 1 = Room height
- H 2 = Height of slope (If a space is required between the wall and the wardrobe/unit, please state the exact distance.)
- T 1 = Depth of slope
- T 2 = Depth of slope

## MEGA-DESIGN

All special-sized products shown  
in this type list for MEGA-DESIGN  
are free of charge!

**Height reductions** (not possible on drawers):

Side-panel (below 2 m, incl. top rim)	99901	-
Carcase	99902	-
Rear wall	99906	-
Wood/lacquer door	99903	-

**Width reductions:**

Carcase (only possible on drawer and flap units, for lowboards on request)	99912	-
Hinge-door wood/lacquer	99913	-
Wall shelf (not below 36 cm, with spotlamps not below 75 cm)	99915	-
Wood/lacquer drawer (not below 25.0 cm)	99917	-
Rear wall	99920	-
Fitted glass shelf	999144	-
Bookbridge (not below 21.1 cm)	99940	-

**Depth reductions** (not possible on drawers):

Fitted shelf (not below 21.9 cm)	99934	-
Fitted glass shelf	999344	-
Side-panel (not below 21.9 cm)	99931	-
Work surface	99933	-

**Side sloping:**

Please observe the notes on making exact measurements on the previous page as these are essential!		
Side-panel	99944	-

**Rear sloping:**

Please observe the notes on making exact measurements on the previous page as these are essential!		
Side-panel	99956	-

Special-sized products are not possible for: rear-lacquered glass fronts, sliding-doors,  
angled (TV) panels, fittings and accessories, profiled shelves, tables.

**More special products are possible.**

**Please get in touch with your customer advisor.**

## Special articles

**Cover panels**

for side and top panelling of fitted wardrobes (support construction and fitting materials must be acquired on site).

Basic price per order	9901	-
+ price per m <sup>2</sup> lacquer or veneer	990	-

Veneer match with fronts can not be guaranteed.

**Rim veneer**

superimposed ex works or rims lacquered for veneer and lacquer versions per m. length	9902	-
------------------------------------------------------------------------------------------	------	---

**Dimensions**

Range	max. length	max. width
MEGA-DESIGN	207.0 cm	34.7 cm

**Individual special-sized products**

If the special-sized product that you require is so unusual that it cannot be illustrated  
with the many special sized products that we already provide and charge for, then we  
will quote you the price using a 33 unit type factor. In your order please state for us  
the relevant enquiry number and the 33 unit type factor stated.

33 -

**Special colours; Note on „Blue Angel“ / Emissions label of DGM****Special colours**

All the hülsta lacquer colours are possible for nearly all the hülsta ranges.  
Availability and prices on request.

**Note on „Blue Angel“ (RAL-UZ 38) and Emissions label of DGM (Class A)**

It is possible that the requirements of the „Blue Angel“ and the DGM Emissions Label  
cannot be met by some of the lacquer colours in price groups III and IV (see here the  
different lacquer versions in the NEO range), depending on the colour mix (surface ratio of  
these colours in the corresponding order). However, the legal requirements are definitely  
met in all cases!

Important notes

Wall composition / assembly instruction

**Important notes:**  
The composition of walls must be ascertained before concluding a contract and be checked by a qualified fitter before assembly takes place.

Assembly may only be carried out by a qualified fitter under careful observation of the assembly instructions.

The plastic Rawl plugs supplied by hülsta as a standard set are only suitable for concrete  $\geq$  C12/15, if the wall composition and compression strength corresponds to the table below. Under no circumstances must a unit be assembled on light masonry.

Furthermore, we provide a mounting set with assembly mortar for the types of walls listed below (see assembly mortar set below). Again, assembly must be carried out by a qualified fitter under careful observation of the wall composition and assembly instruction. The compression strength levels stated below must be met under all circumstances.

Materials table  
with a description of which sets are to be used with the following types of walls:

Standard set	Assembly mortar set only suitable for the materials stated below!			
<div>Concrete C12/15</div> <div>Compression strength <math>\geq</math> 15 N/mm<sup>2</sup></div> <div></div>		Building bricks Mz 12 Compression strength $\geq$ 12 N/mm <sup>2</sup>		Solid blocks of light concrete V2 Compression strength $\geq$ 2 N/mm <sup>2</sup>
		Limestone blocks KS 12 Compression strength $\geq$ 12 N/mm <sup>2</sup>		Perforated blocks of light concrete Hbl 2 Compression strength $\geq$ 2 N/mm <sup>2</sup>
		Perforated sand lime bricks KSL12 Compression strength $\geq$ 12 N/mm <sup>2</sup>		Aerated concrete PP2 Compression strength $\geq$ 2 N/mm <sup>2</sup>
		Vertically perforated bricks HLz 12 Compression strength $\geq$ 12 N/mm <sup>2</sup> Bulk density $\geq$ 1.0 kg/dm <sup>3</sup>		

A different and more suitable type of mounting must be chosen by a qualified fitter in all other cases. hülsta cannot accept any responsibility for the choice of any other types of mounting! Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units.

Mounting sets

<p><b>Labelling in type list drawings / assembly notes for wall units</b></p> <p>The majority of units have two wall mounting points (= number of support boards), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= support boards) is required, this is marked in the drawings in the type list with numbers in black boxes. Every support board requires four mounting screws.</p> <div><div>3</div> = 3 support boards</div> <div><div>4</div> = 4 support boards, etc.</div>		
<p>One <b>assembly mortar set</b> is sufficient for up to a maximum of 3 support boards or 4 wall side-panels.</p> <p><b>Important note:</b> Depending on the composition of the wall (see wall types illustrated above), assembly must be carried out using the special assembly mortar set and a standard trade mastic tool which are the basic essentials for safe and clean workmanship.</p>		
<p><b>Standard set</b></p> <p>The standard set consists of 4 plastic Rawl plugs and 4 mounting screws and is sufficient for 1 support board. The standard sets are included in the packet of fittings to match the number of support boards.</p>		
<p><b>Assembly mortar set for up to a maximum of 3 support boards consisting of:</b></p> <div>9x injection retaining sleeve</div> <div>9x screw-in sleeve</div> <div>1x injection cartridge</div> <div>2x static mixer</div> <div>1x assembly instructions</div> <p>Please use the mounting screws from the standard set (supplied free of charge).</p>	<p><b>Example of order:</b></p> <ul style="list-style-type: none"><li>• Add up number of support boards for all existing unit types</li><li>• Divide the sum by “3”</li><li>• Round up the result to a full number</li></ul> <p>= Number of assembly mortar sets required</p>	<p><b>M2</b></p> <p>-</p>

## Your Hotline to hülsta

Do you have any questions or require any alterations to your order confirmation?  
Do you have any questions on our products or your current order?  
Do you have any complaints about supplied goods or required replacement parts?  
Contact Telephone: +49 (0) 2563 / 86-1627 • email: [orders@huelsta.com](mailto:orders@huelsta.com)

Do you have any questions, suggestions or wishes for the **hülsta product seminars**?  
Contact Telephone: +49 (0) 2563 / 86-1493 • email: [seminare@huelsta.com](mailto:seminare@huelsta.com)

## hülsta Planning Service

Your furn plan planning is so complex that you need our support? We have created the hülsta Planning Service for this kind of situation. hülsta employees will check your planning as quickly as possible. The customer gets a planning that will inspire him!

### **hülsta Planning Service**

Tel.: +49 (0) 2563 / 86-1060

Fax: +49 (0) 2563 / 86-1000

Mail: [Planungsservice-Handel@huelsta.com](mailto:Planungsservice-Handel@huelsta.com)

Mondays to Fridays from 9.00 a.m. until 5.00 p.m.

## Special wishes? Come to us!

### **Maximum individuality! – Maximal flexibility! – hülsta makes most of your special wishes possible.**

And if you do have a wish which is not quite so easy to implement, just give us a call or send us a mail or a fax. We have our own hülsta "Special Wishes Team" who are there to help you realise just these customer requests. These colleagues are professionals when it comes to special products. They plan and calculate the products possible for you and even develop an alternative suggestion if the idea should turn out to be technically impossible.

### **Here is an overview of the hülsta range of special wishes:**

- A lot of special products can be ordered simply via the type list
- Special-sized products are planned simply and professionally
- Competent colleagues advise you by phone, by fax and by mail
- You will be sent alternative suggestions if the idea is technically impossible
- Many special-sized products are available without a surcharge
- Specially qualified carpenters and technicians implement your plans perfectly

### **hülsta Special Wishes Team**

Tel.: +49 (0) 2563 / 86-1060

Fax: +49 (0) 2563 / 86-1000

Mail: [Sonderwunsch@huelsta.com](mailto:Sonderwunsch@huelsta.com)

## We are open Saturdays for you, too!

Our **Saturday hotline** is available from **10.00 a.m. until 5.00 p.m.**

Telephone: +49 (0) 2563 / 86-1800

The hülsta Sales Department is available  
**mondays to Fridays from 9.00 a.m. until 5.00 p.m.**
