

MULTI-BED SLEEPING

MULTI-BED

You can rely on chance when trying to find the perfect bed – or you can search systematically. With **MULTI-BED** all the versions and dimensions are compatible with one another but also with other MULTI furniture from hülsta. This provides you with a maximum degree of choice: different headboards and cover upholstery enhance the basic choice, besides lacquer colours and genuine wood veneers there are also countless fabric and leather versions to choose from. Thanks to the flexible surface heights and optional storage space available, MULTI-BED unites comfort and function intelligently to create a most convincing system – and, more importantly, your own personal dream bed.

Special colours; Note on „Blue Angel“ / Emissions label of DGM

Special colours
All the hülsta lacquer colours are possible for nearly all the hülsta ranges. Availability and prices on request.

Note on „Blue Angel“ (RAL-UZ 38) and Emissions label of DGM (Class A)
It is possible that the requirements of the „Blue Angel“ and the DGM Emissions Label cannot be met by some of the lacquer colours in price groups III and IV (see here the different lacquer versions in the NEO range), depending on the colour mix (surface ratio of these colours in the corresponding order). However, the legal requirements are definitely met in all cases!

Usable bed inside height and space under bed

Note on usable bed inside height:

The support slats of the hülsta beds are delivered in the centre position, i.e. they can be adjusted by 3.2 cm upwards and downwards. If the slats are set in the lowest position, the **maximum usable bed inside height** is achieved.

In the case of some beds, the bed inside height is comparatively low. This means that mattresses in combination with base frames that are somewhat higher are not held so well by the bed side sections. Please note that the usable bed inside height of beds with height adjustable support slats is reduced when these are set higher.

This is how to calculate the individual height from the data supplied with the base frames:

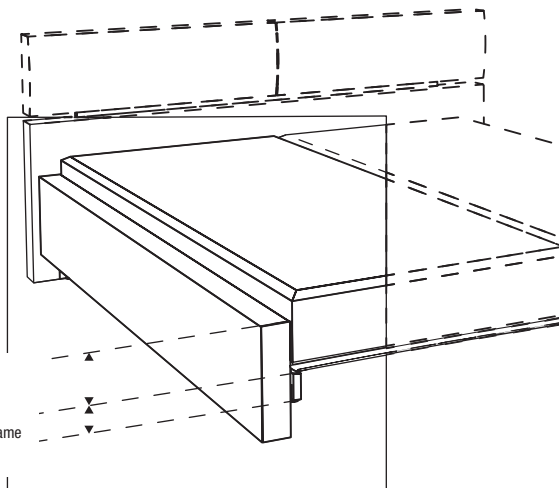

Example: bed and hülsta flex basic B base frame
(back and foot sections adjustable)

Max. usable bed inside height:
18.0 cm

approx. 12.5 cm for holding
mattress

5.5 cm total height of base frame
(example: hülsta flex basic B)

Note on space under bed:

The storage space underneath the base frame is calculated from the bed height minus the usable bed inside height.

Example bed: $42.2\text{ cm} - 18.0\text{ cm} = 24.2\text{ cm}$.
