"It's impressive just how quickly a personal dream room can become perfect reality." A cupboard that is in effect half a cabinet and half a highboard. An individually configurable living room wall arrangement with sliding cabinet door thanks to our flexible side-panel system. A bookshelf with wooden fittings. Low- and sideboards with or without legs. If your furniture needs to be capable of making your own slightly different ideas possible and you place great value on a casual look, now! time is exactly the right range for you. Many different surface versions in high-gloss lacquer, lacquer and wood are exciting to combine easily and clearly – and often in such a surprising way that we sometimes wonder why we didn't think of that ourselves.

Changing versions:

In now! time colour combinations within individual units are possible. In this case please state the versions clearly and separately in the order!
Please state all the versions clearly in the order!

Example:

Doors in high-gloss white lacquer

Carcase and cover shelf in white lacquer

Drawers in core walnut

- **Please note:** Side-panel system, carcasses and low-boards cannot be fitted as room divider.
- **hülsta-SoftFlow:** All drawers with auto pull-in feature with brake as fully pull-out units
- **hülsta-MagicClose:** All wooden hinge-doors with hülsta-MagicClose (gentle closing)

- Since 1996, we are entitled to label all of our modular furniture and base frames with the strictly regulated "Blue Angel", which awards products that are low in emissions and especially environmentally friendly.

Please be sure to see the “now! general” chapter on the following subjects:

- Important notes on including lighting
- Remote control unit for LED lamps
- IR repeater set for lowboards
- Cable aperture assembly set
- Flatscreen TV sizes overview
- Flap hinge
- Wall units
- Maximum loads
- Quality of walls / assembly instructions

Planning notes

Planning lowboards / sideboards / wall units

Planning step 1

Choice of unit

Note:
Please state all the versions clearly in the order (see here the information on the previous page).

Optional legs for low- and sideboards

One set of 6 legs is required for sideboards and for 190 cm wide lowboards. One set of 2 legs and one set of 3 legs are required for 140 cm wide lowboards. When fitting the lowboards on pedestals: see here the sketches on the right!

Planning step 2

Choice of optional accessories

- such as:
- Fitted shelf for sideboard
 - Knobs in a different version

The lowboard stands completely on a pedestal = no legs are required.

Planning step 3

Choice of optional legs / metal substructure

At least one third of the lowboard stands on a pedestal = one set of 3 legs is required for the 140 cm wide lowboard and two sets of 2 legs are required for the 190 cm wide lowboard

At least one half of the lowboard stands on a pedestal = one set of 2 legs is required for the 140 cm wide lowboard and one set of 3 legs is required for the 190 cm wide lowboard

Planning single units

Planning step 1

Choice of carcass in the required version

Planning step 2

Choice of interior fittings

in the required version
such as:
Fitted wooden shelves, fitted glass shelves, constructional shelves, accessories such as LED light strip

Planning step 3

Choice of front(s)

in the required version
such as:
Doors, drawers, open compartments, knobs in a different version

Planning step 4

Choice of cover shelf in the required version

Planning side-panel combinations

Planning step 1

Choice of side-panels in the required number as well as in the required version and height

Planning step 2

Choice of shelves and niche rear walls in the required number as well as in the required version and width

Please note: Only fitted shelves of glass or wood can be fitted in combination with a niche rear wall.

Planning step 3

Choice of optional partitions in the required version

Please note: Partitions can only be fitted on wooden shelves. Partitions are essential if sliding-doors are fitted in front of a 136.6 cm wide wooden shelf.

Planning step 4

Choice of front(s) in the required version such as: Doors, sliding-doors, flaps, drawers, open compartments

Carcase and cover shelf versions, pedestals	Front versions
White lacquer Natural oak Core walnut	White lacquer Natural oak Core walnut High-gloss white lacquer High-gloss sand lacquer High-gloss grey lacquer High-gloss silk grey lacquer

Special combinations

Special combinations are arrangements that are reduced in price. This price advantage is only available when the arrangement is ordered exactly as described. The special combinations can be enhanced by including accessories. These are charged extra.

Possible arrangements

Please superimpose unlined paper and write firmly. In order to avoid slipping, use 2 paper clips or fold the edge of the drawing sheet.

Check list

- 1.) Do the **sketch** and the **order** match? Do the **dimensions** and the **sketch** match the type number? Are all **type numbers** correctly stated in the sketch?
Can one see the position of **door hinges**?
- 2.) Are all **type numbers** correct? Have you perhaps confused **price** and **type numbers**?
- 3.) In combinations of **wooden, lacquer and high-gloss lacquer versions**: Is it clear which units are to be delivered in which version?
- 4.) Is it clear whether the types ordered are to be employed as **wall units** or as **plinth units**?
- 5.) Are all **accessories** such as lamps etc. included in the sketch?
- 6.) Is this an **additional order**? If so, when was the **original order**? If possible, include a sketch on which the existing and new units are clearly marked.

Please also remember the planning notes on the introductory pages!

Note on calculating widths for side-panel combinations:

The width table states all widths up to 315 cm (wider widths always in steps of 35 cm). This width is calculated from a side-panel + shelf. To determine the total width, 3.3 cm must be added for the end side-panel!

Dims. in cm		35	50	70	100	105	120	140	150	175	190	200	210	245	250	280	300	315
Side-panel (incl. 1.5 cm high legs)	216,2																	
Carcase	211,2																	
Side-panel (incl. 1.5 cm high legs)	181,0																	
Carcase	176,0																	
Side-panel (incl. 1.5 cm high legs)	145,8																	
Carcase	140,8																	
Carcase	105,6																	
Sideboards	73,7																	
Carcase	70,4																	
Lowboards	38,6																	
Carcase	35,2																	
Lowboard	24,7																	
Legs	1,8																	

Important note!

Please do not forget to include the following details with each order. This avoids time-consuming correspondence and unnecessary delays in delivery.

Version(s)	Customer	Date	Commission
------------	----------	------	------------

Important notes on including lighting

In all now! ranges lighting with manual switches may only be included **on furniture units** (e.g. the top LED lamp for wardrobes) or **in open compartments, open carcasses or behind clear glass fronts or fronts with a clear glass panel** (e.g. the light strip with LED lamps). **It is not possible to include lighting behind non-transparent fronts (e.g. wood, lacquer, high-gloss fronts or fully rear-lacquered glass fronts).**

Remote control set

Radio remote control set

The lamps are normally operated by an external foot switch. As an alternative we can also provide a radio remote control, which is charged extra. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

The radio remote control set consists of:

- 1 transmitter
- 1 receiver

Article	Remote control
	Set for LED lamps
Order no.	3333
	-

IR repeater set

IR repeater set

Infrared signal transmission set for operating media units behind wooden/high-gloss fronts. You can operate as many media units as you like in one compartment with one set. The following applies:

- At least 4 cm distance between unit and front
- One set must be used for each compartment
- The transmitter must be placed in the immediate vicinity of the receiver eye of the media unit
- High-frequency signals cannot be transmitted

The IR repeater set consists of:

- 1 receiver eye (Ø 3.0 cm) incl. standing bracket (4.2 x 5.5 x 3.0 cm)
- 1 electric transmitter
- 1 plug EVG 12 V
- Cable clamps

Article	Infrared repeater set
	for lowboards (1 set per compartment)
Order no.	7777
	-

Cable aperture assembly set

Cable aperture assembly set

Cable aperture assembly set for fitting cable apertures on site in cover shelves, carcasses, centre partitions and rear walls in wood/lacquer/high-gloss lacquer versions. The cable aperture drill bit can be used with all standard power drills.

The cable aperture assembly set consists of:

- 1 cable aperture drill bit (Ø 60 mm)
- 3x cable aperture type K3 (aluminium colour)

Please be sure to follow the information and notes in the assembly instructions!

Article	Cable aperture assembly set
Order no.	1111

Flatscreen TV sizes overview

Flatscreen TV sizes overview

These schematic drawings are only for purposes of orientation as to how high and wide flatscreen TV's with different screen diagonal measurements are. The sizes depicted below are however only approximate and vary according to the manufacturer.

On the basis of the sizes you can estimate approximately how wide a lowboard for example has to be so that the flatscreen TV does not protrude at the sides.

Flap hinge

Flap hinge

If not otherwise marked in the type list, all the units with a flap have the flaps hinges at the bottom.

Wall fitting

Important notes:

Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class C12/15.

For other materials (please see next page) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site. Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used.

For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

Further notes:

If 2 - 8 Raster (assembly) units are included as wall units, a maximum load per unit of 40 kg must not be exceeded for reasons of stability!

The wall units can only be fitted on absolutely solid walls. Light masonry is not suitable for this purpose.

If (assembly) units are stacked on top of one another, a wall bracket must be ordered for each stacked unit.

For each project please remember to leave a 2.0 cm gap at the top to be able to mount units.

Maximum loads

Maximum loads

Max. load of wooden and glass (fitted) shelves (up to 70.5 cm wide) and drawers: 25 kg

Max. load of wooden and glass (fitted) shelves (between 70.5 and 105.7 cm wide): 15 kg

Max. load of wooden and glass (fitted) shelves (from 105.7 cm wide): 10 kg

Max. load of cover shelves: 35 kg per metre length for floor units.

Please also note any maximum loads which may be stated in the type list for the individual units!

Wall composition / assembly instruction

Important notes:

The composition of walls must be ascertained before concluding a contract and be checked by a qualified fitter before assembly takes place. Assembly may only be carried out by a qualified fitter under careful observation of the assembly instructions.

The plastic Rawl plugs supplied by hülsta as a standard set are only suitable for concrete \geq C12/15, if the wall composition and compression strength corresponds to the table below. Under no circumstances must a unit be assembled on light masonry.

Furthermore, we provide a mounting set with assembly mortar for the types of walls listed below (see assembly mortar set below). Again, assembly must be carried out by a qualified fitter under careful observation of the wall composition and assembly instruction. The compression strength levels stated below must be met under all circumstances.

Materials table

with a description of which sets are to be used with the following types of walls:

Standard set	Assembly mortar set only suitable for the materials stated below!			
Concrete C12/15 Compression strength $\geq 15 \text{ N/mm}^2$ 		Building bricks Mz 12 Compression strength $\geq 12 \text{ N/mm}^2$		Solid blocks of light concrete V2 Compression strength $\geq 2 \text{ N/mm}^2$
		Limestone blocks KS 12 Compression strength $\geq 12 \text{ N/mm}^2$		Perforated blocks of light concrete Hbl 2 Compression strength $\geq 2 \text{ N/mm}^2$
		Perforated sand lime bricks KSL12 Compression strength $\geq 12 \text{ N/mm}^2$		Aerated concrete PP2 Compression strength $\geq 2 \text{ N/mm}^2$
		Vertically perforated bricks HLz 12 Compression strength $\geq 12 \text{ N/mm}^2$ Bulk density $\geq 1.0 \text{ kg/dm}^3$		

A different and more suitable type of mounting must be chosen by a qualified fitter in all other cases. hülsta cannot accept any responsibility for the choice of any other types of mounting! Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units.

Mounting sets

Labelling in type list drawings / assembly notes for wall units

The majority of units have two wall mounting points (= number of support boards), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= support boards) is required, this is marked in the drawings in the type list with numbers in black boxes. Every support board requires four mounting screws.

3 = 3 support boards

4 = 4 support boards, etc.

One **assembly mortar set** is sufficient for up to a maximum of 3 support boards or 4 wall side-panels.

Important note: Depending on the composition of the wall (see wall types illustrated above), assembly must be carried out using the special assembly mortar set and a standard cartridge applicator tool which are the basic essentials for safe and clean workmanship.

Standard set

The standard set consists of 4 plastic Rawl plugs and 4 mounting screws and is sufficient for 1 support board. The standard sets are included in the packet of fittings to match the number of support boards.

Assembly mortar set for up to a maximum of 3 support boards consisting of:

9x injection retaining sleeve
 9x screw-in sleeve
 1x injection cartridge
 2x static mixer
 1x assembly instructions

Please use the mounting screws from the standard set (supplied free of charge).

Example of order:

- Add up number of support boards for all existing unit types
 - Divide the sum by "3"
 - Round up the result to a full number
- = Number of assembly mortar sets required
