Important notes: wall composition / assembly instruction	19

PULSO adds elegant impact to the bedroom. The characteristic bed design combines pure shapes with an inviting atmosphere to create favourite furniture for everyone who like to sleep in style. The storage units of the range follow the same principle – generous, versatile and a little extravagant.

Wardrobes

Height reductions at intervals of 1.0 cm without surcharge

- Hinge-door wardrobes according to the endless assembly principle
- Wardrobe with plain doors (and drawers) with handle slat or design doors with shell handle; handle slat and shell handle optionally in a different version than the hinge-doors
 - Optionally with flush-front mirrors (against surcharge)
 - With optional cornice profile and/or top LED lamp (12 V; 2.4 W)
 - Wardrobe interior carcass in standard white lacquer
 - Standard interior fittings: 2 fitted shelves, 1 clothes rod
 - Functional and high-quality interior wardrobe fittings (see “Wardrobe interior fittings” type list)

Beds

- Beds with wooden headboard; in three widths and three lengths
- Comprehensive bed accessories: arched support, LED headboard lamp, socket and USB socket for headboard

In combination with the hülsta Sleeping System, the beds guarantee highest sleeping comfort. With its high-quality spring base frames and mattresses, the hülsta Sleeping System provides the perfect prerequisites for relaxing sleep (see “SLEEPING SYSTEMS“ type list).

Ancillary units

- Consoles in one height and two widths, ancillary table
- Chests with drawers or doors, high chests with drawers or with flap and drawers, wall chests with drawers; in four widths
- Angled shelves, with optional LED lamp
- Drawer frames of consoles and chests in standard grey version

Quality features

- Wardrobe doors with handle slat resp. shell handle and spring hinges
- All metal hinges
- Visually unobtrusive 2.5 mm drilled holes for wardrobes
- Centre partitions and end side-sections of wardrobes with special plinth adjustment
- **hülsta-SoftFlow:** Drawers of wardrobes on hidden bearings incl. auto pull-in feature with brake as fully pull-out units
- **hülsta-Push-to-open:** Drawers and doors of ancillary units with hülsta-Push-to-open device
- **hülsta-MagicClose:** All wardrobe doors with door cushioning system

Changing versions

The model no. for the tabletop and table substructure must be stated separately, as colour combinations are possible.

Range introduction

Labelling in type list drawings / assembly notes for wall units

Labelling in type list drawings / assembly notes for wall units

The majority of units have two wall mounting points (= number of base plates), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= base plates) is required, this is marked in the drawings in the type list with numbers in black boxes. Please be sure to note here the information and notes in the "Wall composition" chapter!

3

4

Notes on delivery

Notes on delivery:

The majority of the units are delivered standard as **fully connected units (glued)** so that the carcass **cannot be disassembled**. There are however some **exceptions** to this rule:

Some carcasses are delivered as complete units but can be **disassembled into individual sections** in the final customer's home. These types are marked with a **1** in the type list.

1

Some carcasses are delivered **in individual sections** because of their size. These types are marked with a **2** in the type list.

2

The fronts with the number **2** are delivered separately and can therefore always be (dis-) assembled.

Wall fitting

Important notes: Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units. That is why wall mounting should only be carried out by properly trained and qualified fitters. hülsta supplies materials for mounting units on walls for nearly all the units and which should be used for safety and for constructional reasons. The assembly materials supplied by hülsta (plugs, screws) are only suitable for fitting components on to concrete in firmness class C12/15. For other materials (please see separate materials table in the wall composition chapter) we provide you with an assembly mortar set as an extra order. Please note that this assembly mortar set is also only suitable for the materials listed in the materials table. If walls are made up of other materials (e.g. plastered or lighter wall materials), one should use another method of mounting better suited to the load on site. Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. For the reasons stated above it is absolutely essential to enquire about the composition of any walls before signing any contracts.

Possible arrangements

As an alternative to planning an individual unit from the complete range there is the possibility of choosing from specially suggested wardrobes. This eases planning. Incorporating accessories can enhance the wardrobes. These are charged extra.

Hinge-door wardrobes

Notes on planning hinge-door wardrobes according to the endless assembly principle

Hinge-door wardrobes can be planned endlessly and combined with one another. Due to the various element widths one can create many total wardrobe widths. In this way the available floor space can be exploited to the full. For each wardrobe combination, the first element on the left is considered to be the basic unit, incorporating both outer side-sections. One can only include one basic unit in each combination. When adding on extension units, the right-hand side-section of the basic unit is employed as the end side-section of the complete combination. In the case of single-door hinge-door units one can choose between left- and right-hand hinges. The graphics shown below give you an excerpt from our wardrobe assortment.

Standard interior fittings per unit: 2 fitted shelves, 1 clothes rod.
All interior surfaces are in white lacquer.

Dimensions

	without cornice profile	with cornice profile	with top LED lamp	with cornice profile and top LED lamp
Heights incl. plinth:	229.6 cm	230.8 cm	234.6 cm	235.8 cm
Height reductions at intervals of 1.0 cm without surcharge				
Depths:	61.4 cm	61.5 cm	74.2 cm	68.7 cm
Widths:	see pages 7-9			

Wardrobe examples

3-door hinge-door wardrobe 152 cm wide

Hinge-door wardrobes

- Hinge-door wardrobes can be planned endlessly and combined with one another; exception: plain doors and design doors cannot be combined with one another
- Cornice profile, mirror fronts and lamps at a surcharge
- Unit outside widths: 42, 52, 82, 102, 122, 152, 162, 202 cm (basic units)
40, 50, 80, 100, 120, 150, 160, 200 cm (extension units)
- Unit inside widths: 38, 48, 78, 98 cm
- Outside depth: 61.4 cm
- Inside depth: 56 cm
- Door opening angle: approx. 94°

5-door hinge-door wardrobe (centre door with right hinges) 252 cm wide

Lamps

All hinge-door wardrobes are available with top LED lamps. One top LED lamp is fitted standard above each element – 1 or 2 door – 12 V; 2.4 W. If required, a top LED lamp can be fitted centrally above each door. Please include a sketch in all cases. Switching is done by an external foot switch. A radio remote control is also available as an alternative, which is charged extra. The radio remote control incorporates one transmitter and one receiver which operate all the LED lamps. The foot switch is omitted when the radio remote control is employed.

Please note: When including the cornice profile, please note that the distance to the ceiling must be at least 2.0 cm.

6-door hinge-door wardrobe 302 cm wide

Radio remote control with change of colour temperature (transmitter + receiver)

2119 -

Top LED lamp Surcharge for each additional lamp (2.4 W) Type

395 -

This luminaire contains built-in LED lamps of the energy classes A++ to A. The lamps cannot be changed in the luminaire. 12 V

Hinge-door wardrobes

For each project please remember to leave a 2 cm gap to the ceiling and at the side for assembly!

Angled shelves

The angled shelves may only be fitted on absolutely solid walls. Gypsum or other light masonry is not suitable for this purpose. Please be sure to note here the information and notes in the "Wall composition" chapter!

Angled shelves 22.6 cm high; 22.6 cm deep for fitting anywhere on walls Max. load: 15 kg LED lamps for angled shelves: see below!	 51.2 cm wide	 70.0 cm wide	 128.0 cm wide
	Price gr. I II	550 - -	570 - -

LED lamps for angled shelves

This luminaire contains built-in LED lamps of the energy classes A++ to A. The lamps cannot be changed in the luminaire. 12 V		LED lamps incl. foot switch. A radio remote control is possible for operation (against a surcharge).	
LED lamps for angled shelves 1 W per lamp	 for 51.2 cm width	 for 70.0 cm width	 for 128.0 cm width
	Price gr. I II	5001 -	5002 -

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the "all on" or "all off" buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

Special-sized products

Special heights, special widths, special depths

Special heights

- Hinge-, folding- and sliding-door wardrobes can be reduced in height at intervals of 1.0 cm.
- Below eye-level we recommend fitting a top cover shelf made of panelling material. Please state in order!
- Special heights in stepped versions (not possible on sliding-door wardrobes) at a surcharge.

Surcharge per step:

00030

-

Special widths

Only applies to hinge- and folding-door wardrobes

- Single-door units, left or right hinges, can be reduced down to 25 cm width (apart from profiled doors).
- Twin-door units can be reduced at both sides down to 50 cm total width (apart from profiled doors).
- Interior fittings such as drawers and other fittings cannot be reduced in width.
- For notes on width reductions on MULTI-FORMA II sliding-door wardrobes please see special-sized products for MULTI-FORMA II!

Special depths

- Depth reductions are made on side sections, plinths, cornices and shelves.
- Interior fittings such as drawers and other fittings cannot be reduced in depth.
- A max. reduction of 30.0 cm is possible on hinge- and folding-door wardrobes.
- A max. reduction of 9.0 cm is possible on profiled hinge-doors.
- For sliding-door wardrobes, a max. reduction of 30.0 cm is possible (max. 18 cm in combination with the electrical opening system for MULTI-FORMA II).
- Please note that for technical production reasons not every special depth can be achieved:
2.5 cm standard reduction between 0 and 2.5 cm
5.0 cm standard reduction between 4.5 and 5.0 cm
27.5 cm standard reduction between 27.0 and 27.5 cm

Notes on calculating sizes of sloping units

Side sloping

Sloping is only possible on single-door units. The door hinge (left or right) is positioned on the taller outer side of the unit.

Measurements required:

- H 1 = Room height
- H 2 = Height of slope (If a space is required between the wall and the wardrobe/unit, please state the exact distance.)
- B 1 = Width of slope
- B 2 = Width of slope
- G = Total width
- S = Wardrobe width

Please note!

- If the slope cuts across the position of a handle, the handle of this door only is positioned further down in production.
- As floors, ceilings and walls are never exactly straight, the exact room size must be measured using a spirit level.
- If a cornice is fitted, please state if this is to be continued in the sloping section.

Rear sloping

Rear sloping is possible on all wardrobe units.

Measurements required:

- H 1 = Room height
- H 2 = Height of slope (If a space is required between the wall and the wardrobe/unit, please state the exact distance.)
- T 1 = Depth of slope
- T 2 = Depth of slope

PULSO

Wardrobes

Special heights:			
Hinge-door	- Wood	0003	without surcharge
Hinge-door	- Mirror	00031	without surcharge
Special widths:			
for single-door unit	- Wood	0005	-
for single-door unit	- Mirror	00051	-
for twin-door unit	- Wood	0006	-
for twin-door unit	- Mirror	00061	-

Special widths are not possible for hinge-door wardrobes with design doors or with plain doors with drawers.

When ordering extra fitted shelves and clothes rods			
Size reduction surcharge per fitted shelf		9991	-
Size reduction surcharge per clothes rod		9992	-

Special depths:			
Surcharge per unit		0007	-

Special depths are not possible for hinge-door wardrobes with plain doors with drawers.

When ordering extra fitted shelves			
Size reduction surcharge per fitted shelf		9993	-

Side sloping:			
Surcharge per unit without cornice in the slope		9994	-
Surcharge per unit with cornice in the slope		99916	-

Side sloping is possible up to a minimum height of 88.0 cm.

Rear sloping:

Carcase		99932	-

When ordering extra fitted shelves			
Size reduction surcharge per fitted shelf		999341	-

Beds

Bed in special length 190 cm		99964	-
Bed with two footboards (all-round bed)		99967	without surcharge

More special products are possible. Please get in touch with your customer advisor.

Wardrobe doors are also available as separate units and are charged as follows:

For 1 hinge-door/folding-door wing: 50% of the concerning 1-door hinge-door extension unit

For 1 sliding-door including mechanism: 35% of the twin-door sliding-door wardrobe

For door superstructures, type **100** (max. 98 cm wide, only for assembly between wardrobes): 100% of twin-door hinge-door extension unit

Panels for side and top covering of fitted wardrobes (not possible for high-gloss versions; support construction and fitting materials must be acquired on site).

For veneered/lacquered versions (max. 268.0 cm long, max. 59.0 cm wide, 2.0 cm thick)			
Basis charge per order:		9901	-
+ price per m ² - lacquer		990	-
+ price per m ² - veneer		990	-

Veneer match with fronts can not be guaranteed.

Edge veneer			
for veneered/lacquered versions per m. length		9902	-

165° hinges
Wardrobe doors can also be fitted with **165° hinges** against a surcharge (only possible on plain, straight hinge-doors; impossible on fabric-covered doors and accent fronts). Please mark the doors clearly in the order!

Surcharge for 165° hinges per hinge-door:		180	-
-------------------------------------------	--	------------	---

High-gloss care set			
Polish, polishing sponge and polishing cloth (incl. instructions) for protecting and maintaining the high-gloss surfaces		36	-

Individual special-sized products
If the special-sized product that you require is so unusual that it cannot be illustrated with the many special sized products that we already provide and charge for, then we will quote you the price using a HK unit type factor. In your order please state for us the relevant enquiry number and the HK unit type factor stated.

Special colours; Note on „Blue Angel“ / Emissions label of DGM

Special colours
All the hülsta lacquer colours are possible for nearly all the hülsta ranges. Availability and prices on request.

Note on „Blue Angel“ (RAL-UZ 38) and Emissions label of DGM (Class A)
It is possible that the requirements of the „Blue Angel“ and the DGM Emissions Label cannot be met by some of the lacquer colours in price groups II and III (see here the different lacquer versions in the NURIA range), depending on the colour mix (surface ratio of these colours in the corresponding order). However, the legal requirements are definitely met in all cases!

Switch options for lamps: Radio remote control with change of colour temperature

Radio remote control with change of colour temperature

The lamps are normally operated by an external foot switch. The colour temperature of the LED lamps is cold white if a foot switch is used. A 4-channel radio remote control is also available as an alternative, which is charged extra. Several lamps can be operated with each of the 4 channels. All 4 channels can be dimmed separately at the push of a button. The colour temperature of all 4 channels can be set to any level from cold white (approx. 6500 kelvin = the basic setting of the LED lamps) to warm white (approx. 2700 kelvin). If warm white is required, a radio remote control must be ordered. It is also possible to switch all channels on and off simultaneously with the "all on" or "all off" buttons. The radio remote control consists of one transmitter and one receiver. If several receivers are required because of the arrangement of the units, these and the corresponding cables are provided ex-works (no surcharge). The foot switch is omitted when the radio remote control is used.

The following points must be noted with the radio remote control:

- The receiver must be positioned behind a rear wall or under plinth shelves (at least 20 mm space required under plinth shelves).
- The total wattage power of all lamps included per receiver must not exceed 30 W.
- 4 channels = 4 light groups
- 1 light group = x lights
- All lamps within a light group can be dimmed to the same brightness.
- The change of the colour temperature takes place for all lamps in all light groups.
- The radio remote control is not suitable for equipment operating on 110 V.

Please be sure to note the operating and programming instructions!

4-channel radio remote control with change of color temperature

4-channel radio remote control with change of color temperature

Type	2119	-
------	------	---

Examples of use (schematic diagrams)

Example 1

Lights inside a unit

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamp in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps in the open compartment

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlamp in the right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Example 2

Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamp and the LED light panels in the left cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the LED spotlamps and the LED light panels in the centre cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the LED spotlamp and the LED light panels in the right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Example 3

Lights in units set apart

Channel 1 operates (and dims) all the lights in light group 1, i.e. the LED spotlamps in the left, centre and right cabinet

Channel 2 operates (and dims) all the lights in light group 2, i.e. the top LED light panels in the left, centre and right cabinet

Channel 3 operates (and dims) all the lights in light group 3, i.e. the bottom LED light panels in the left, centre and right cabinet

Notes:

The total wattage power of all lamps included per receiver must not exceed 30 W. The change of the colour temperature takes place for all lamps in all light groups.

Usable bed inside height and space under bed

Note on usable bed inside height:

The support slats of the hülsta beds are delivered in the centre position, i.e. they can be adjusted by 3.2 cm upwards and downwards (exception: for LUNIS beds in the standard surface height 1 only by 3.2 cm upwards). If the slats are set in the lowest position, the **maximum usable bed inside height** is achieved. In the case of some beds, the bed inside height is comparatively low. This means that mattresses in combination with base frames that are somewhat higher are not held so well by the bed side sections. Please note that the usable bed inside height of beds with height adjustable support slats is reduced when these are set higher.

This is how to calculate the individual height from the data supplied with the base frames:

Example (for all beds): bed and hülstaflex basic B base frame (back and foot sections adjustable)

Max. usable bed inside height:
18.0 cm

approx. 12.5 cm for holding mattress
5.5 cm total height of base frame (example: hülstaflex basic B)

LUNIS bed in standard surface height 1 and hülstaflex basic B base frame (back and foot sections adjustable)

Max. usable bed inside height:
14.0 cm

approx. 8.5 cm for holding mattress
5.5 cm total height of base frame (example: hülstaflex basic B)

Note on space under bed:

The storage space underneath the base frame is calculated from the bed height minus the usable bed inside height.

Example bed: $42.2 \text{ cm} - 18.0 \text{ cm} = 24.2 \text{ cm}$.

Wall composition / assembly instruction

Important notes:

The composition of walls must be ascertained before concluding a contract and be checked by a qualified fitter before assembly takes place.

Assembly may only be carried out by a qualified fitter under careful observation of the assembly instructions.

The plastic Rawl plugs supplied by hülsta as a standard set are only suitable for concrete \geq C12/15, if the wall composition and compression strength corresponds to the table below. Under no circumstances must a unit be assembled on light masonry.

Furthermore, we provide a mounting set with assembly mortar for the types of walls listed below (see assembly mortar set below). Again, assembly must be carried out by a qualified fitter under careful observation of the wall composition and assembly instruction. The compression strength levels stated below must be met under all circumstances.

Materials table

with a description of which sets are to be used with the following types of walls:

Standard set	Assembly mortar set only suitable for the materials stated below!	
Concrete C12/15 Compression strength \geq 15 N/mm ² 	 Building bricks Mz 12 Compression strength \geq 12 N/mm ²  Limestone blocks KS 12 Compression strength \geq 12 N/mm ²  Perforated sand lime bricks KSL12 Compression strength \geq 12 N/mm ²  Vertically perforated bricks HLZ 12 Compression strength \geq 12 N/mm ² Bulk density \geq 1.0 kg/dm ³	 Solid blocks of light concrete V2 Compression strength \geq 2 N/mm ²  Perforated blocks of light concrete Hbl 2 Compression strength \geq 2 N/mm ²  Aerated concrete PP2 Compression strength \geq 2 N/mm ²

A different and more suitable type of mounting must be chosen by a qualified fitter in all other cases. hülsta cannot accept any responsibility for the choice of any other types of mounting! Please note that if the units are not mounted properly on the wall, there is a risk of the units falling down or tipping over – especially when alternative mounting materials acquired on site have been used. Generally speaking, you as a dealer/qualified fitter are responsible for the correct wall mounting of the units.

Mounting sets

Labelling in type list drawings / assembly notes for wall units

The majority of units have two wall mounting points (= number of support boards), if these are to be fitted as wall units. This is not explicitly mentioned in the type list. If a different number of wall mounting points (= support boards) is required, this is marked in the drawings in the type list with numbers in black boxes. Every support board requires four mounting screws.

- 3 = 3 support boards
- 4 = 4 support boards, etc.

One **assembly mortar set** is sufficient for up to a maximum of 3 support boards or 4 wall side-panels.

Important note: Depending on the composition of the wall (see wall types illustrated above), assembly must be carried out using the special assembly mortar set and a standard trade mastic tool which are the basic essentials for safe and clean workmanship.

Standard set

The standard set consists of 4 plastic Rawl plugs and 4 mounting screws and is sufficient for 1 support board. The standard sets are included in the packet of fittings to match the number of support boards.

Assembly mortar set for up to a maximum of 3 support boards consisting of:

- 9x injection retaining sleeve
- 9x screw-in sleeve
- 1x injection cartridge
- 2x static mixer
- 1x assembly instructions

Please use the mounting screws from the standard set (supplied free of charge).

Example of order:

- Add up number of support boards for all existing unit types
 - Divide the sum by “3”
 - Round up the result to a full number
- = Number of assembly mortar sets required

hülsta Planning Service

Lots to do? A customer wants his project finished and you haven't got enough time? Or the project is so complex that it will take too much time?

This is exactly the kind of situation we created the hülsta Planning Service for. hülsta's employees create the required project for you at short notice. Based on your information, we implement the project perfectly with all views and a complete order list ready for immediate forwarding to the customer.

The hülsta check list (available at <https://hulsta.com/de/service/showroom/>) makes it all really easy for you. You won't forget anything with this list and the customer receives a project he will be thrilled about as quickly as possible.

Mon-Fri: from 9am to 5pm

Special wishes? Come to us!

Maximum individuality! – Maximal flexibility! – hülsta makes most of your special wishes possible.
And if you do have a wish which is not quite so easy to implement, just give us a call or send us a mail or a fax. We have our own hülsta "Special Wishes Team" who are there to help you realise just these customer requests. These colleagues are professionals when it comes to special products. They plan and calculate the products possible for you and even develop an alternative suggestion if the idea should turn out to be technically impossible.

Here is an overview of the hülsta range of special wishes:

- A lot of special products can be ordered simply via the type list
- Special-sized products are planned simply and professionally
- Competent colleagues advise you by phone, by fax and by mail
- You will be sent alternative suggestions if the idea is technically impossible
- Many special-sized products are available without a surcharge
- Specially qualified carpenters and technicians implement your plans perfectly
