# LIVING IN THE **BATHROOM**

Curtains, wallpaper, Metro tiles or natural stone surfaces create a homely atmosphere.

Neglected for too long, the bathroom finally gets the attention it deserves. As a wellness oasis, retreat and hotspot of the home, the lifestyle bathroom provides flowing transitions to the bedroom or living room. This is achieved by clever design features. Inspired by stylish city lofts, glass units or half-height walls offer interesting perspectives and allow exciting architectural links. This opens up the room and provides a natural transition from the bed to the bathroom. Continuous flooring enhances the loft character. Wooden floors create a warm and comfortable atmosphere. A balanced colour choice in the bathroom and bedroom ensures a cosy overall look whilst adding interesting accents. The lifestyle bathroom makes a creative and individual impact, thus delivering an entirely new ambience in the room.

Wood or stone flooring creates transitions that visually link different living worlds.

A lifestyle bathroom focuses on cosiness and comfort. Armchairs, side tables and pictures are therefore moving into the bathroom. Add some plants and generously draped curtains to create a feel-good space. Bare feet sink into soft rugs, loungers invite you to relax and the bathtub takes centre stage in the middle of the room – this is how you design your private spa at home. Listen to your favourite music through the speakers, dim the lighting via the smart home settings and you will create a perfect lifestyle bathroom.

Ambient lighting, a rain shower or relaxing music from speakers add comfort to the bathroom. Smart home apps regulate the feel-good atmosphere.

Wall colours and original wallpaper set the scene in the lifestyle bathroom and add striking accents.
